

The MacroAir Difference

With the Airvolution D, we have eliminated the 2 biggest headaches of HVLS Fans, the Gearbox and the VFD. No more metal on metal contact in the Gearbox that takes on all the stresses of rotating the fan hub and blades, as well as the air pushing back against the blades. No oil leaks. No more issues with voltage fluctuations and power outages that cause VFD's to fail. We have a cleaner, lighter, more efficient, more durable, more reliable and easier to install design!

Old

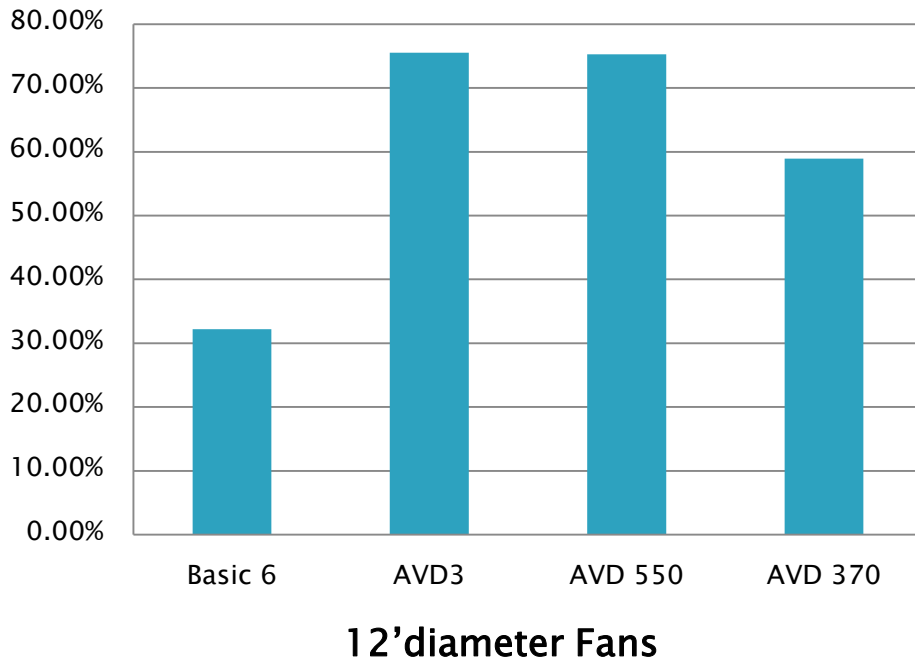

New

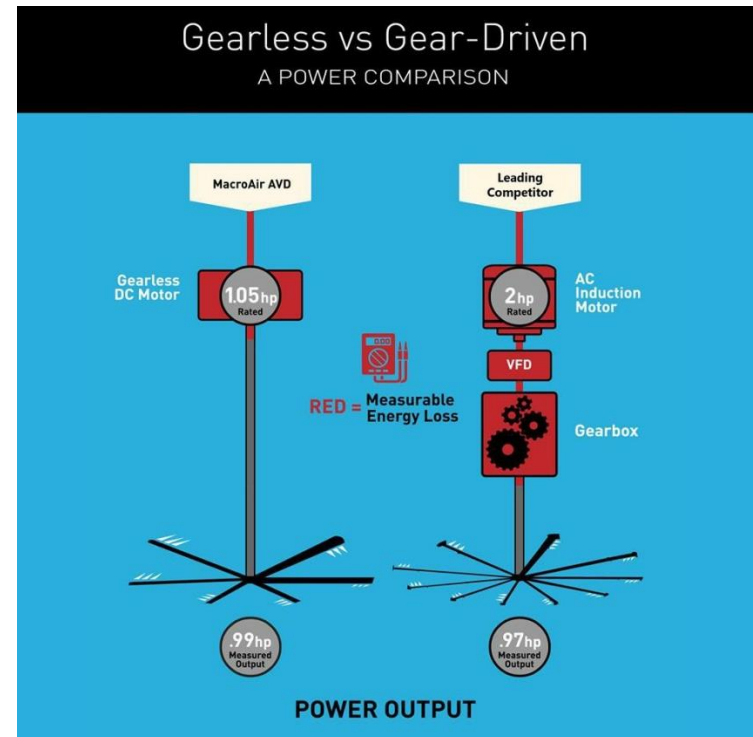

More efficient than competitive fans!

Electro-Mechanical Efficiency

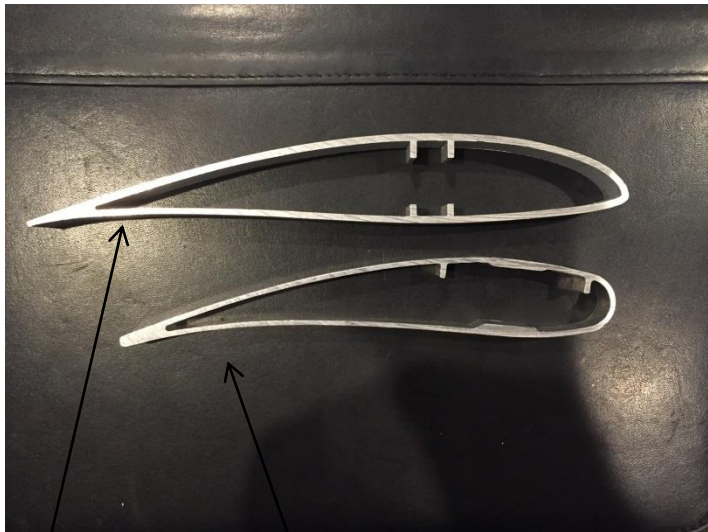

Elimination of electrical and mechanical losses

Better CFM per Watt Ratio!

Moves more air than competitive fans!

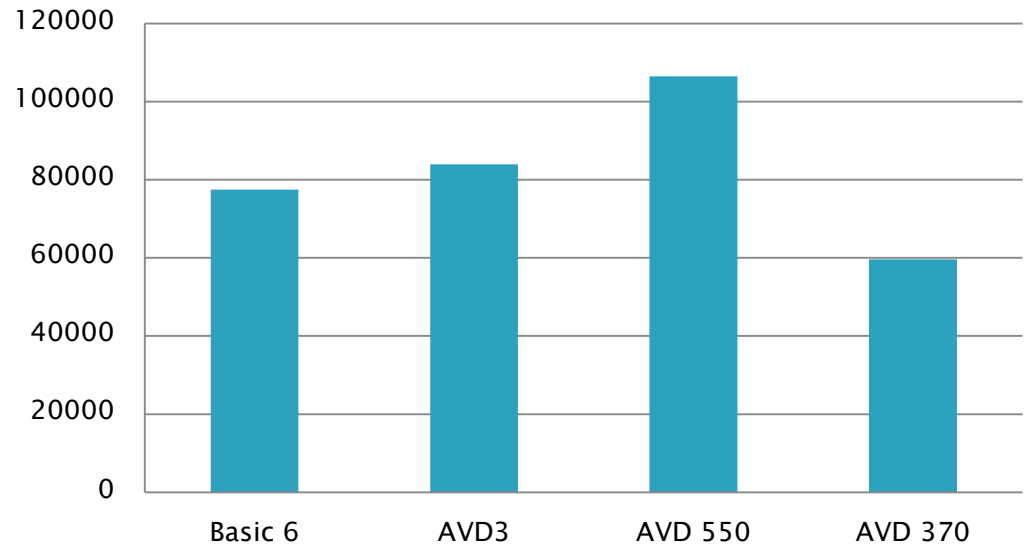

MacroAir

Leading Competitor

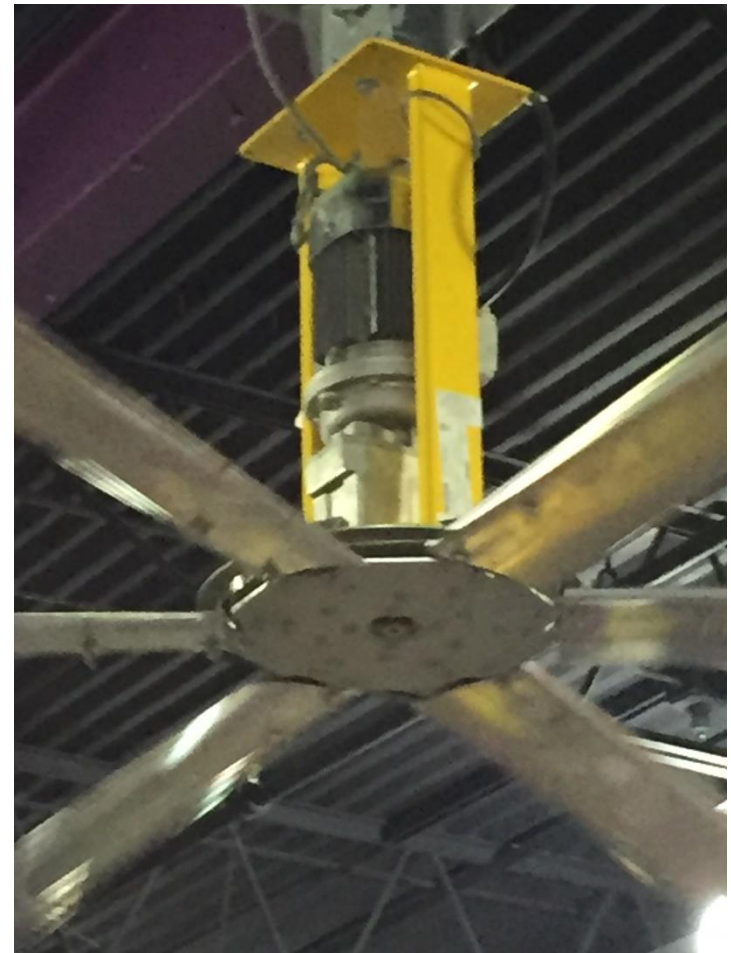

More efficient and longer Airfoil
More Surface Area = More Air

Airflow
(CFM)

12'diameter Fans
